RING SIZE GUIDE

How to use this ring sizer:

1. Print this document on an A4 sheet of paper.
Do not 'fit' or 'shrink' to page or it will not be the correct size.
2. For accuracy, make sure the outside box is 175 x 50mm.
3. Cut around the outline of the sizer and carefully make a slit along the dotted line indicated.
4. Make a loop out of the sizer by pushing the slim end into the slit you have created.
5. Place the loop around the finger that you will be wearing your ring on.
6. Adjust the slider so that the loop of paper sits comfortably around the desired finger.
7. Make sure you can slide the loop from the base of the finger over the knuckle with no problems.
8. Read the letter indicated by the arrow. This is your ring size.

Important:

- The slider must be able to slide on and off the finger comfortably.
- Pulling the sizer too tightly will give you the wrong size.
